OPEN.

THE APACHE SOFTWARE FOUNDATION
provides support for the Apache Community of open-source software projects, which provide software products for the public good.

INNOVATION.

APACHE PROJECTS ARE DEFINED
by collaborative consensus based processes, an open, pr agmatic software license and a desire to create high quality software that leads the wa y in its field.

COMMUNITY.

WE CONSIDER OURSELVES
not simply a group of projects sharing a server, but r ather a community of developers and users.

FEATURED PROJECT

APACHE HTTP SERVER (HTTP://HTTPD.APACHE.ORG/)
The Apache HTTP Server is an open-source HTTP server for modern operating systems including UNIX, Microsoft Windows, Mac OS/X and Netware. The goal of this project is to provide a secure, efficient and extensible server that provides HTTP services observing the current HTTP standards. Apache has been the most popular...
